

Bearings for Sugar Cane Knives

This Mexican Sugar facility uses Cooper split to the shaft roller bearings on their cane knives on the main conveyor.

The photographs show Cooper 02 Series BCP 300mm EX (Expansion) and GR (Fixed) roller bearings installed on the 600rpm cane knives on the main conveyor. The radial load of this installation is 26 tons.

This customer has been satisfied with the performance and return on investment on Cooper bearings for at least 18 years. Inspection and maintenance is very easy with the split to the shaft feature which is standard for all Cooper bearing regardless of size and mounting arrangement.

Cooper 02 BCP 300mm EX (Expansion) and GR (Fixed) bearings installed on this 600rpm main conveyor have a radial load of 26 tons.

Cooper bearings have been in use on this application without replacement for approximately eight years. The Cooper hallmark split to

the the shaft feature permits inspection and maintenance to be carried out in the shortest possible time giving more uptime and lower maintenance cost for this customer.
